

Mockup Feedback

1. On the first page, you should rearrange the two images below the top image. Seems kind of awkward to have text in the center of the two images.
2. Maybe get rid of the image of the map and just include the location in word description on the first page.
3. Font suggestion: Titleist font matches the aesthetic.
4. I like the size of the first image on the first page. Perhaps think of sizing the image on your third page like that as well.
5. I like your consideration of white space.
6. If you want, you can consider having different images transitioning.
